TECHNICAL SKILLS

Languages : HTML5, CSS3, JavaScript(ES6)
Frameworks and Libraries : ReactJs, Bootstrap
Tools : Git , GitHub, VS Code

EDUCATION

Bachelor of Computer Science, MG University , Kottayam 2016 - 2019

PROJECTS

Personal Portfolio [Demo](#) / [GitHub](#)
(HTML5 , CSS3, JavaScript)

Built a fully responsive personal portfolio website to show my skill sets , works , projects and my professional journey in a special and interactive way for Hiring Managers and Recruiters

Crypto Currency [Demo](#) / [GitHub](#)
(HTML5 , CSS3, JavaScript, API)

A landing page with integrated with API to fetch data to show all Information regarding global Crypto Currencies with their current price, market cap, day to day changes in price as well as latest news about these Currencies.

Image Searcher [Demo](#) / [GitHub](#)
(HTML5 , CSS3, JavaScript, API)

Image Searcher is a web application built with HTML, CSS, and JavaScript, powered by an API. It allows users to search for images by entering keywords in the search bar. The application sends requests to the API, which retrieves relevant images based on the user's query. The search results are then displayed dynamically on the webpage, providing users with a visually appealing and intuitive way to explore and discover images online

Text to Speech [Demo](#) / [GitHub](#)
(HTML5 , CSS3, JavaScript, API)

Text-to-speech (TTS) technology converts written text into spoken words. It creates with HTML, CSS, JavaScript, and APIs. HTML provides the structure, CSS offers styling for the interface, and JavaScript handles the logic, including fetching text input and invoking the TTS API. The TTS API, such as the Web Speech API, processes the text and generates the corresponding speech. This combination allows users to enter text into a web application, which is then converted into speech, providing accessibility and convenience for various applications, including assistive technologies, language learning tools, and more.
